

POLY-GONE® Polymer Dispersant & Belt Wash

Anti-Blinding Systems

Features:

- No Caustics
- No Ammonias
- No Solvents
- No Acids
- Neutral pH
- No Sodium Metasilicate
- Guaranteed 16,000:1 Dilution Ratio on Belt Filter Presses

Uses:

- Improves Sludge Solids
- Improves Belt-Filter Press Throughput
- Cleans Polymer Tanks
- Cleans Polymer Lines
- Cleans Slippery Polymer Spills
- Ends Belt Blinding from Polymer & Sludge Buildup

Benefits:

- The only product to use to disperse polymer for polymer spills, polymer pumps, and polymer line cleaning!
- Reduces sludge hauling costs.
- Reduces your polymer consumption drastically.
- Passes Acute Toxicity of fresh and salt-water species.
- Eliminates power washing or additional cleaning cycles.
- Safe for process, equipment, and operators.
- Passes Priority Pollutants for land application of your sludge.
- Injected into your wash water lines and goes directly into your wash box for constant belt cleaning.
- Increases your Gallons Per Minute of sludge processing.

Passes:

- Priority Pollutant Scan EPA Method 624
- Priority Pollutant Scan EPA Method 625
- Acute Toxicity Analysis
